27 January 1969

NOTE FOR: Mr. Coffey

Way back on the 29th of November you asked how the revised PAT B System was going. This request was passed on to [redacted], who has been attempting to give us a little paper on the subject ever since.

STAT

In a conversation with Mr. [redacted] on 27 January 1969, he assures me that there have been no problems developed as yet with the revised system. Tests are being administered in the field as required; promising candidates invited into Headquarters are completing the second part of the test while here, and the A&E Staff is, of course, evaluating the results. Mr. [redacted] assures me that he will advise us if any problems should arise in the future.

Wick - Thank you for following up - I don't think this response by [redacted] is good enough. We had much hurrah by other people about time loss as a consequence

of having to bring people in for
 Part II - also extra costs
 and worries raised about
 A & E not being able give
 timely evaluations -
 timely input for DDP.
 Believe we should be able to
 get a proper report on all
 aspects of the new test.
 If needed, I'll write to
 D Pen & D Med.
